### **Health and Risk Management Delivers**

**System Optimization** – Every organization is dependent on the efficiency of each of its individual systems and their ability to work as a cohesive unit. Discovering potential weaknesses allows you to strengthen your organization as a whole, thereby maximizing output, employee satisfaction and bottom lines.

- ◆ **Clarification of Healthcare-Related Policies and Tax Benefits.** Maximizing savings and being aware of ACA, EEOC, DOL, OSHA, Work Comp and Disability guidelines including built in incentives and tax laws
- ◆ **Decrease Risk expenditures and Control Health Plan Costs**
- ◆ **Employee Prosperity** – Providing employee education and addressing productivity; *new avenues of integrated products and services that manage high risk participants*
- ◆ **Implementation and Utilization** – lower risk costs; higher productivity – 24/7 support utilizing national and local providers. Don't go it alone
- ◆ **Risk Management Strategy** – Modern Population Health, Healthcare-Related Policy, Benefits Integration, Claims and Data Integration (Medical, Pharmacy, Worker's Comp, Biometrics), Predictive Analysis, Worker's Comp Analysis, Wellness Best Practices and Systems Optimization

**Close to 80% of all US companies will utilize healthcare-focused risk management solutions this year saving an estimated 6 billion dollars**  
**National estimates expect savings to be over 50 billion annually by 2021**

The first step to implementing a successful healthcare-focused risk management strategy is to assess related current systems and potential issues. Meridian offers a free Risk Reduction Outline which provides valuable next steps in implementing a customized strategy including projected return on investment models specific to your organization.
