

The LifeProbes Kiosk

The LifeProbes Kiosk performs automated pre-consultation patient assessments that allow healthcare professionals to maximize operational efficiencies by improving the speed and flow rate of patient onboarding in medical offices, clinics, and hospitals .

- Improves patient flow in medical offices, clinics, and hospitals
- Improves the image and reputation of the medical facilities using technology and shorter consultation time
- Saves time and money to assess the mandatory pre-consultation
- Efficient triage in Hospital ER

LifeProbes Time Saving

Number of patients / days	Time Minutes	Time Minutes
	Nurse	LifeProbes
Pre-consultation time based on 20 patients /day	300	40
Pre-consultation time based on 50 patients /day	750	100
Saving time per day based on 20 patient/days	4 hours and 33 minutes	
Saving time per day based on 50 patient/days	11 hours	

LifeProbes Cost Saving

Replacing a Med Tech with a LifeProbes Kiosk saves an average of \$43,000 per year per unit.
